EDUCATION

Bennett University

Bachelor of Technology (Computer Science), CGPA: 9.0

Oct 2021 – May 2025

Greater Noida, India

G.D. Goenka Public School

Science

July 2017 - May 2021

EXPERIENCE

AI Intern

Hagerstone International Pvt. Ltd.

Jun 2025 – Present

Noida, India

- Developed an in-house Project Management System (PMS) to streamline internal project tracking and reporting, reducing manual workload by 40% and improving team visibility into project status.
- Migrated the company website from WordPress to React Native, implementing Tailwind CSS-driven UI components that enhanced responsiveness and boosted user engagement by 30%.
- Executed comprehensive SEO optimisation across key pages, improving search engine rankings and increasing organic traffic by 25%.
- Implemented automated testing using Jest for React Native components, bolstering code reliability and identifying 8 critical bugs before deployment to ensure smooth application performance.
- Spearheaded development of a REST API using Node.js to connect the in-house PMS with the company's Slack workspace, streamlining notifications and cutting down average response time by 30 minutes.

Software Developer Intern

Hundred Solution

Jan 2025 – May 2025

Remote

- Worked on the Odoo ERP platform, gaining hands-on expertise in ERP systems, workflows, and module customisation to align with business requirements.
- Integrated Odoo modules with WordPress via custom PHP scripts and payloads, enabling seamless data synchronisation between the ERP and the company website.
- Contributed to full-stack native app development, setting up backend architecture with PostgreSQL and exploring MCP server integrations to support scalable data handling.

Software Trainee

Axess.ai

Jan 2024 – Nov 2024

Hybrid, Noida

- Improved IoT platform performance by reducing latency by 15% and enhancing data processing speed by 25%, leading to smoother real-time device monitoring.
- Designed interactive dashboards using Node.js and vanilla JavaScript, improving user experience by 30% through more intuitive visualisations and responsive layouts.

PROJECTS

Legal AI (Python, NLP, Hugging Face, Pegasus, T5, BERT, LSTM, RNN)

Sept 2023

- Built AI-powered text summarisation models for legal documents, improving summary accuracy and relevance by 25% compared to baseline approaches.
- Integrated summaries into a React web application for real-time processing, enabling users to upload legal texts and instantly obtain concise, structured insights.

Real-Time E-Commerce Web App (Node.js, Express.js, MongoDB, WebSocket)

Mar 2023

- Developed a scalable backend architecture using Node.js, Express.js, and MongoDB, reducing API response time by 40% under concurrent user load.
- Implemented live product updates with WebSocket, along with secure authentication and payment systems, providing a robust and seamless real-time shopping experience.

SKILLS & CERTIFICATIONS

Technical: React Native, React.js, Node.js, Express.js, Tailwind CSS, RESTful APIs, Artificial Intelligence, Data Analysis, NLP, DevOps, LLM Models.

Languages: C++, JavaScript, Python, SQL, MySQL.

Tools & Platforms: N8N, Pabbly, Power BI, Odoo ERP, WordPress, Git, PostgreSQL.

Certifications: AWS Cloud Practitioner and Cloud Foundation, AWS Quest, Google Data Analytics Professional Certificate, Ruby on Rails Web Development.

ACHIEVEMENTS

- Spearheaded the development of an in-house Project Management System (PMS) that improved project visibility, automatically reporting, and reduced manual tracking effort by 40%.
- Integrated an ERP-based procurement tracking module, enabling streamlined purchase management, material request approvals, and real-time vendor coordination.
- Delivered an AI-powered marketing automation agent capable of generating branded content (posts, captions, and stories) and auto-publishing to Instagram and LinkedIn, significantly reducing content creation and scheduling time.
